## PROJECT DETAILS:

<b>Project Title</b>	<b>: SportsMe</b>
<b>Duration</b>	: -
<b>Team Size</b>	: 2
<b>Language</b>	: Swift
<b>Environment/Technologies</b>	: iOS SDK and Xcode.
<b>Frameworks Used</b>	: UIKit Framework, Realm, AVKit.

### Description:

SportsMe is a entertainment application. Where users can communicate through video's recorded by them and other users can respond to that video. This application is all about discussing sports and sportsmen. Each video uploaded by the user we call it as a battle, anyone can join in this battle(Max. 5 persons can join). Each participant will get three chances to rebute(alternative chances). Each battle will have a winner and winner will be declared based on the points given for the post(Each battle will have max.15 posts) at the end of 24hrs from that last post uploaded. It's kind of replicant to **Tik-Tok** application.

### Roles and Responsibilities:

1. Involved in designing UI.
2. Used Realm for saving data to Locally to device.
3. Implementation of functionalities.
4. Using AVKit for audio and video
5. Using GraphQL as a backend.
6. AWS S3 for video upload and streaming.
7. FirebaseSDK for Authentication.
8. Maintaining multiple environments.
9. Requirements gathering.
